

A summary of ABC Teachers' gender pay gap as of 5th April 2022

## NUMBER OF EMPLOYEES

**936**  
employees

## HOURLY PAY RATES

The gender pay gap is an equality measure that shows the difference in average (mean and median) earnings between men and women.

### Mean hourly pay rate

**Mean** is the average hourly pay rate, calculated by adding the hourly pay rates for all our employees then dividing by the number of employees.

### Median hourly pay rate

**Median** is the middle hourly pay rate, when we arrange all our pay rates for all our employees in order from lowest to highest.

## PAY GAPS BY PAY BAND QUARTILES

We employ more women than men across all pay band quartiles. This is broadly reflective of the workforce demographic as 81% of ABC Teachers' employees are women.

### Lower quartile

### Lower middle quartile

### Upper middle quartile

### Upper quartile

# BONUS PAYMENTS

Only a small number of men and women in commercial and senior roles receive bonuses or commission as ABC Teachers has traditionally preferred to pay competitive base salaries, alongside a good benefit package.

## Percentage of staff receiving bonus payments

There was a 4.1% difference between the number of men and women being paid a bonus or commission for their performance in the year to April 2022

## Mean bonus pay over 12 months

**Mean** is the average bonus paid, calculated by adding all bonuses for employees then dividing by the number of employees who received a bonus.

## Median bonus pay over 12 months

**Median** is the middle bonus paid, when we arrange all bonuses for employees in order from the lowest to highest.

## CONCLUSION

ABC Teachers is incredibly proud of all our employees, and we are a company which firmly believe in fairness, equality and inclusion.

We aim to attract and retain a passionate and diverse workforce that reflects the education community we serve.

We are committed to paying our male and female staff equally for equivalent roles, but analysis shows that a gender pay gap does exist.

This is due to a number of factors – some of which are not entirely in our control. ABC Teachers only has full control over the pay and bonuses of internal staff, who make up just 3% of our entire workforce. The pay of our supply staff is mainly market driven. For example, male teachers tend to prefer long-term placements, and after 12 weeks, under Agency Workers' Regulations, they are entitled to the same pay as the school's own equivalent staff. Female teachers tend to favour the more flexible aspect of supply, and often do not work in placements that lasts for 12 weeks.

Over the last year, the increase in supply staff as a percentage of the total workforce has driven up both the mean and median gender pay gap based on hourly pay, however our pay gaps by pay bands remain low, with none exceeding the national average.

The percentage of staff receiving bonuses remains similar year on year. In terms of the mean pay gap on bonus, whilst last year appears to have been an anomaly, we have seen a gradual shrinking in the pay gap over the last 4 years from 90% in FY18 to 82% in FY20 to 68% in FY22, with the median following a similar trajectory.

Since April (and therefore excluded from this report), in light of the cost of living crisis, all of the lowest paid internal roles in the company have received a significant uplift of up to 28%, plus all but the highest earners were paid a one-off cost of living bonus.

Overall, we are pleased with our improvement, and we will continue to do all we can to reduce our gender pay gap even further. In particular, we will try to reduce the gaps in our hourly pay rates and bonus payments by ensuring all our staff have the same opportunities to progress, develop and enjoy a rewarding career at ABC Teachers.
